

# 2017 KPP ENHANCED FARM TRACTORS

## All rules stated above for 2016 KPP Farm Stock Tractors apply with the addition of the following:

1. All tractors must be equipped with a hand operated, spring return (deadman) throttle. Proper operation will be checked during inspections.
2. **Wheelie bars are required on all tractors:**
  - Pads on bottom of bars to be a minimum of 5 inches square.
  - Pads to be a minimum of 32 inches rearward from the center of the rear end housing.
  - Pads maximum of 10 inches off the ground.
  - Wheelie bars and hitch may not be connected
  - Outside to outside of wheelie bar pads to be a minimum of 20 inches
  - Wheelie bars must support the weight of the tractor for the weight class being pulled.
3. All tractors must be equipped with a seat belt (lap belt).
4. All tractors must have a factory style R.O.P.S. (roll over protection system)
5. All spark ignition tractors must have a working kill switch.  
Diesel Tractors Must have an air shut off in the form of a flapper over the intake or guillotine. All shutoff will be tested during inspections.
